

\$AYDC

Whitepaper

High-Quality Data - Best Treatment Planning AI

Whitepaper: Ask Your Dentist Coin (\$AYDC)

askyourdentist.io

Summary

Introduction

\$AYDC is a pioneering cryptocurrency developed on the Solana blockchain, specifically designed to enhance the Sixeyes dental treatment planning and second opinion app. This token serves as the financial backbone linking a long-established real-world dental business with the digital landscapes of Web 2.0 and Web 3.0.

Purpose

\$AYDC facilitates the payments within the Sixeyes app and supports a broader vision of integrating cutting-edge AI technology for dental treatment planning worldwide.

Background

The Need for Innovation in Dentistry

Patients often doubt their dental treatment options due to invasiveness, cost concerns, or fear of overtreatment. Moreover, diagnostic errors and improper treatment planning are all too common, eroding patient trust. Traditional solutions for a second opinion typically involve consulting with other doctors within the same clinic or different clinics, which may still fail to offer impartial advice.

Sixeyes changes this dynamic by enabling your dentist to upload your case to our app, where it is reviewed by a panel of two experienced doctors from around the world. This global academic board ensures that each diagnosis and treatment plan is unanimous, professional, and tailored to each patient's unique situation, enhancing trust and satisfaction.

Dental Leaders Academy

Founded in 2019, Dental Leaders Academy has quickly risen to prominence in the continuous dental education sector. Using its own platform of online courses, in-person events and live-streaming, Dental Leaders Academy has a community of over 20,000 members, dentists from Europe, the United States and Asia.

Its commitment is to provide dental professionals with the tools, knowledge, and support they need to transcend the ordinary and reach new heights of clinical excellence, using the most brilliant mentors and professors worldwide.

Simultaneously, it is dedicated to cultivating the leaders of tomorrow in the field of dentistry. By fostering a culture of inspiration and mentorship, we ensure that the future of dentistry is in the capable hands of visionary professionals who are ready to shape and redefine the industry.

The Sixeyes App: Revolutionizing Dental Diagnostics

Sixeyes stands out as the preeminent global platform for professional second opinions in dentistry. It boasts two distinguished boards, Academic and Scientific, selected based on stringent criteria of professional renown and clinical expertise. Dentists affiliated with Sixeyes can securely upload patient medical data for confidential review, facilitating collaborative discussions among a trio of experts. This collective wisdom from Sixeyes' esteemed boards aids in delivering prudent and suitable treatment decisions.

Facilitated by the Ask Your Dentist Coin, the Sixeyes app revolutionizes dental diagnostics and treatment solutions, providing unbiased second opinions of the highest caliber.

Patients often grapple with uncertainties regarding dental treatments, whether due to concerns about invasiveness, costs, or potential over-treatment. Moreover, diagnostic inaccuracies and flawed treatment plans further exacerbate patient apprehensions and diminish trust. Conventional avenues for seeking second opinions typically involve consulting with local practitioners, yet impartial advice remains elusive.

Sixeyes disrupts this paradigm by offering a global platform where dentists can submit cases for evaluation by a diverse panel of other two experts. This international academic consortium ensures consensus-driven diagnoses and tailored treatment recommendations, fostering patient confidence and contentment.

The Sixeyes App utilizes advanced AI algorithms to learn from this huge amount of high-quality data, enhancing the precision and reliability of treatment planning to support dentists worldwide.

This ecosystem utilizes the \$AYDC currency to facilitate the annual subscription-based affiliation of dentists from around the world.

Technology

Solana Blockchain:

\$AYDC cryptocurrency is a SPL Token minted on Solana blockchain.

The SPL (Solana Program Library) token standard is akin to Ethereum's ERC-20 but tailored for the Solana blockchain. It facilitates the creation, management, and exchange of digital assets on Solana ensuring seamless interoperability within its ecosystem. SPL tokens are versatile, supporting functionalities such as minting, burning, and token transfers, thus enabling a wide array of financial and non-financial applications. From governance tokens to stablecoins and utility tokens, SPL enriches the Solana ecosystem with diverse digital assets.

SPL tokens are the future of cryptocurrencies, because they are a reflection of the innovation, diversity and creativity that characterize Solana.

Why Solana blockchain?

The biggest draws of Solana are its fast and low cost transactions. It's reportedly able to handle 65,000 transactions per second, and the average cost per transaction is \$0.000025

Solana is a layer-one (L1) smart contract protocol developed to enhance network scalability and performance through its novel Proof-of-History technology. The Solana ecosystem is supported by its own native cryptocurrency, SOL

Tokenomics

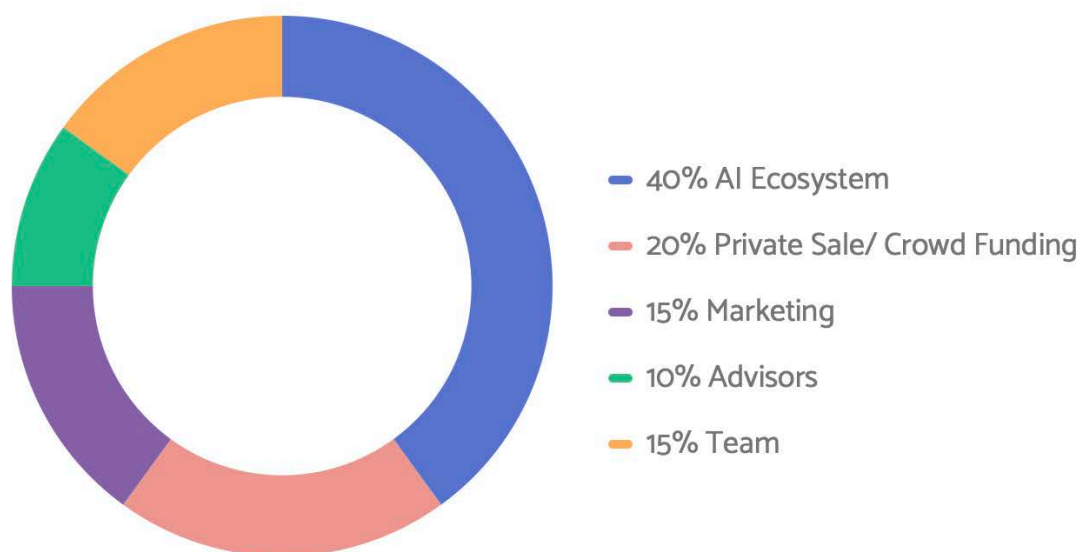

Token Details:

- Name: Ask Your Dentist Coin
- Symbol: \$AYDC
- Type: SPL Token
- Token address: 3p6KugJPtH3DTY4fbBjNwYsswiTKdbbRDPLBgMCUtmZB
- Total Supply: 500 million
- Token Features: Minting revoked to cap the supply, freezing disabled to ensure liquidity.

Utility: Detail the specific uses of \$AYDC in paying for services on the Sixeyes app and Dental Leader Academy's online platforms.

Distribution:

- AI Ecosystem: 40%
- Private Sale and Crowdfunding: 20%
- Marketing: 15%
- Advisors: 10%
- Team and Operations: 15%

Token Public Sale Structure

In response to the evolving economic narrative, we have prepared a public sale strategy that aligns with the market conditions and investor sentiment. To ensure a balanced and strategic approach, we will be splitting the token sale into four distinct timeframes, releasing 5% of the total token supply at each stage ultimately reaching a cumulative total of 20%.

The scheduled release dates on decentralized exchanges (DEX) are as follows:

26 September 2024

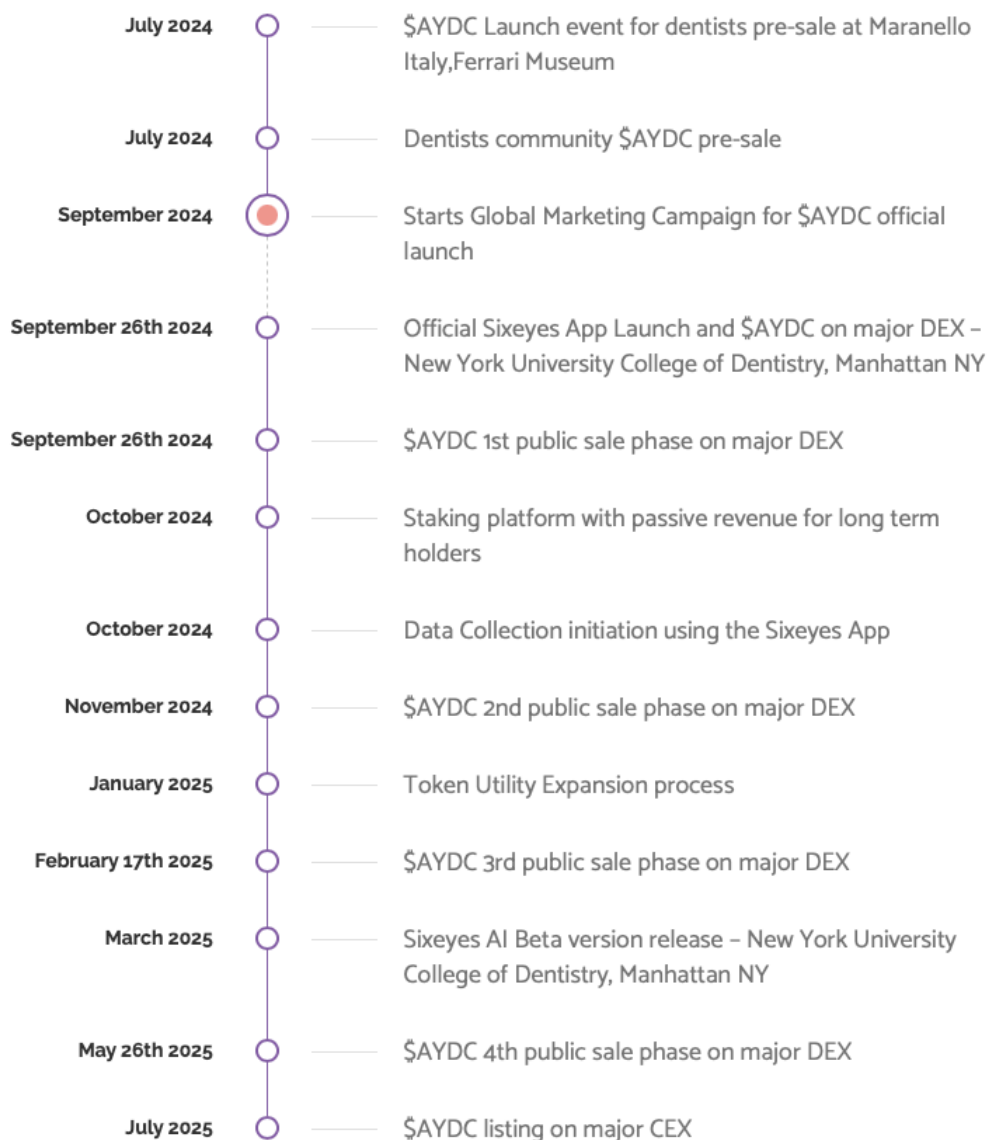

8 November 2024

17 February 2025

26 May 2025

This phased approach is designed to align with market conditions and maximize value for all stakeholders, ensuring a balanced and transparent distribution of tokens.

Road Map

Legendary Professor | United States
Prof. Myron Nevins

Associate clinical professor of periodontology at the Harvard School of Dental Medicine

Editor-in-Chief: International Journal of Periodontics & Restorative Dentistry
Co-editor of "Implant Therapy: Clinical Approaches and Evidence of Success"
Master Clinician Award, American Academy of Periodontology
Member and Past President of the American Academy of Periodontology

Technology Director | Romania
Zen Harabagiu

20 years of combined experience in technology and graphic design,
software development, web design, and digital marketing.
Proven track record of successfully blending technology and design to deliver
innovative solutions, implementing cutting-edge technologies.
Versatile professional with a passion for creative problem-solving and a drive
for innovation in every project I undertake.

Legal and Regulatory Compliance

Privacy Standards:

- Compliance with data protection regulations such as GDPR (General Data Protection Regulation) or CCPA (California Consumer Privacy Act).
- Implementation of privacy-enhancing technologies (PETs) like zero-knowledge proofs or ring signatures to safeguard user anonymity.
- Adherence to privacy-focused principles such as data minimization and user consent.

Security Standards:

- Adherence to industry-standard cryptographic protocols to secure transactions and user data.
- Regular security audits and vulnerability assessments to identify and mitigate potential threats.
- Implementation of multi-factor authentication (MFA) and robust encryption mechanisms to protect user accounts and wallets.
- Compliance with regulatory requirements for anti-money laundering (AML) and know-your-customer (KYC) procedures to prevent illicit activities.

Transparency Standards:

- Public disclosure of project details, including team members, development roadmap, and financial statements.
- Regular publication of audit reports and transparent governance processes to ensure accountability.
- Open-source development to allow independent verification of code and promote community participation.
- Adoption of blockchain explorers and other tools to provide real-time visibility into transaction histories and network activity.

Risk factors associated with cryptocurrency investments:

- **Volatility:** Cryptocurrency markets are highly volatile, with prices subject to rapid fluctuations, leading to potential loss of investment value.
- **Regulatory Uncertainty:** Regulatory frameworks governing cryptocurrencies vary widely across jurisdictions and are subject to change, leading to uncertainty and potential legal risks for investors.
- **Security Breaches:** Cryptocurrency exchanges and wallets are vulnerable to hacking and security breaches, leading to the loss of funds for investors.
- **Market Manipulation:** Due to the lack of regulation and oversight, cryptocurrency markets are susceptible to manipulation by large traders or bad actors, leading to unfair market practices.

- **Liquidity Risks:** Some cryptocurrencies may have limited liquidity, making it difficult to buy or sell large amounts without significantly impacting the market price.
- **Counterparty Risks:** Investors may face counterparty risks when dealing with exchanges, wallets, or other service providers that may default or engage in fraudulent activities.
- **Technology Risks:** Cryptocurrencies rely on complex technological infrastructure, and investors face risks related to software bugs, network failures, or protocol changes.

Conclusion

\$AYDC is a crucial element of the Sixeyes ecosystem, supporting its growth from a nascent technology to a leading solution in AI-driven dental treatment planning.

Each phase builds on the previous to ensure technological advancement, user adoption, market expansion, and sustainable innovation, setting a clear path towards achieving long-term success in integrating blockchain and AI in dentistry.

Buying \$AYDC and trusting our new Sixeyes App, is more than a strategic investment, you will participate to increase the medical skills of diagnosis and treatment planning at the global scale and raise the patient's level of trust for dental industry.
